

Develop Digital Signage for Mission Botswana

Project Title	Develop Digital Signage for Mission Botswana
Project Summary	Develop digital signage to facilitate communication with Embassy Botswana employees.
Country	Botswana
Country/Region of Focus	Botswana

Project Description

The project envisions enhancing communication with employees of Mission Botswana located at numerous sites around the country. The project will consist of a digital signage solution such as Google Sign Bulider or Screely and displaying a webpage. The intern would be responsible for designing a professional looking webpage, bringing together the Embassy's twitter feed (<https://twitter.com/usembassybw>), current BWP/USD exchange rate, current weather, and a newsfeed.
